

The Importance of International Cooperation under Disruptive Changes

Recommendations and Lessons Learnt from a Fruitful German-Japanese
Dialogue on the Energy Transition

Friday, 20th April 2018

Press and Visitors' Center of the Federal Government (PBZ)

Background

In the face of the paltry ambitious global implementation of the Paris Agreement the vivid – and sometimes also controversial dialogue – of leading industrial nations such as Germany and Japan is becoming more important than ever. Concerning the area of climate and resource protection cooperative knowledge exchange can speed up developments.

Since its foundation in May 2016, the German-Japanese Energy Transition Council (GJETC) has been working on strategic and systemic analysis to develop policy advice for new and long-term perspectives on the way to an ambitious energy transition.

Common challenges have been identified and differences in perception, notions and framework conditions have been discussed.

The GJETC is an experiment on the intensification of bi-national scientific dialogues. This experiment is based on the conviction that joint solutions can be found, but only if diverging interests, motivations and values of the partners are transparent, clearly articulated and mutually respected.

The members and supporters of the Council are going to share their experiences and recommendations and discuss the pros and cons for such binational institutions as well as ideas for future endeavors.

Language

German and Japanese (simultaneous interpretation)

Financed by

Program

13:30 Admission & Registration

Moderation: Dagmar Dehmer, Journalist

14:00 Opening & Greeting Address

H.E. Takeshi Yagi, Ambassador of Japan (tbc)

14:05 Keynote I

Harry Lehmann, Director, Division Environmental Planning and Sustainability Strategies, Federal Environment Agency (UBA)

14:20 Keynote II

Takashi Omote, Executive Director, New Energy and Industrial Technology Development Organization (NEDO)

14:35 2 years of bi-national cooperation in the GJETC – Recommendations and Critical View on the Energy Transition in Germany and Japan

Peter Hennicke, former president of Wuppertal Institute, Co-Chair of GJETC

Jun Arima, Professor for Energy & Environmental Policies, University of Tokyo, Member of GJETC

15:15 Panel Discussion: „Germany and Japan as Role Models for the Global Energy Transition?“

Moderation:

Dagmar Dehmer, Journalist

Panelists:

Harry Lehmann, Federal Environment Agency (UBA)

Peter Hennicke, former president of Wuppertal Institute, Co-Chair of GJETC

Jun Arima, University of Tokyo, Member of GJETC

16:00 End

Venue

Press and Visitors' Center of the Federal Government (PBZ)

Reichstagsufer 14, 10117 Berlin

(Close to S+U Station Friedrichsstraße)
